# 1. Current & planned collection of Agri. Statistics (cont.)

## 1.2. Surveys – There are some changes:

- Change in No of surveys: Since 2008 conduct surveys to collect data on many crops. Before 2008 only conduct survey for very important crops (paddy, coffee)
- Change in frequency of data collection of some items such as: livestock production, fishery production: 2 times/year (before 2008: one time/year.
- Change in No. of provinces selected for conducting survey on Producer price: from 50% to 100% (to calculate PPI & gross output for province level)

## **2. Availability of Statistics on farmer' income**

Statistics on farmer' income has been conducted every 2 years.

The last survey was conducted in 2006 (data available). The survey in 2008 is now in the training stage.

# **3. Availability of agri. Statistics databases**

## 3.1. Census in 2006

GSO develops two types of databases: Micro database & Macro database (available in July 2008 in website of GSO)

3.2. Survey: There is database on yield of paddy since 2007 (collected from sample survey)

## **4. Adoption of information technology & internet access**

The current website of GSO is

<http://www.gso.gov.vn>

The website presented in Vietnamese & English. Users can get information related to agriculture & other fields such as price index, NSA, population,....

Since 2006 the website has been linked to websites of related offices in Vietnam and other countries.

## **5. Current dissemination strategies of agri. Statistics (Pub. Web)**

Agriculture data is disseminated through various ways such as: Statistical yearbook; Press conferences, distributes Papers (for monthly & quarterly reports), CD-ROM, Webside of GSO
