Concluding the statement, as indicated by the Gross Domestic Product advanced estimates, Malaysia's economy is on track for moderate growth, propelled by key sectors like Services, Construction, and Agriculture. This is also contributed by the increasing tourism activities and tourism-related industries, as well as the progress of investment and the implementation of major infrastructure projects. In addition, the government's strategic initiatives, including targeted training programmes, aim to foster a business-friendly environment as well as upskill the workforce, with a special focus on inclusivity for gig economy workers, which are set to open up new opportunities for youth and targeted groups in the job market. Consequently, the nation's labour market is anticipated to remain steady, with prospects for modest growth in the forthcoming months.
