

CHILDREN STATISTICS, MALAYSIA, 2022

INTRODUCTION

Children Statistics, Malaysia, 2022 presents selected statistics on population, health, education and child protection. These statistics were among the indicators used in measuring the children's quality of life and well-being in accordance with the concepts and guidelines recommended by the United Nations Children's Fund (UNICEF).

This publication consists of four parts. The first part presents infographic on selected children statistics, while the second part presents summary of findings. The third part shows statistical tables representing the children at national and state level. The fourth part consists of technical notes to explain the concept, definition and formula to assist users in understanding the statistics published in this publication.

POPULATION

W. P. Putrajaya recorded the highest percentage of children under-18 in 2022 which is 41.6 per cent of the total population of W.P. Putrajaya, 0.12 million. This is followed by Kelantan (35.3%) and Terengganu (34.0%).

Meanwhile, Pulau Pinang recorded the lowest percentage of 23.4 per cent. However, Selangor recorded the highest number of children under-18 in Malaysia at 1.81 million followed by Johor (1.12 million) and Sabah (1.06 million). The lowest number of children under-18 was recorded in W.P. Labuan which was 0.31 million.
