

CONSUMER PRICE INDEX MALAYSIA JUNE 2021

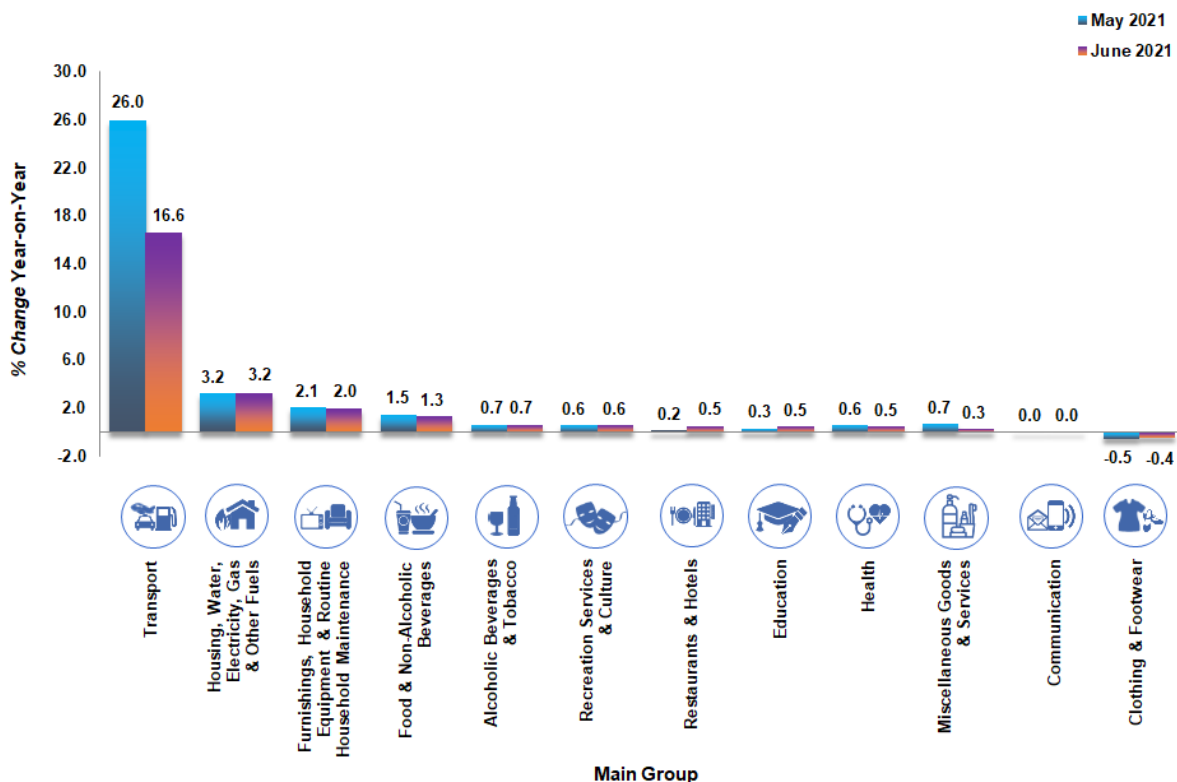

Summary Findings

Consumer Price Index (CPI) increased 3.4 per cent in June 2021 to 123.2 as against 119.1 in the same month of the preceding year. CPI remained positive for the fifth consecutive month since February 2021 due to the lower base effect last year as a result of the decline in fuel prices for private vehicles. Transport group (16.6%) was the main contributor to the increase in the headline inflation. This was followed by Housing, Water, Electricity, Gas & Other Fuels (3.2%); Furnishings, Household Equipment & Routine Household Maintenance (2.0%) and Food & Non-Alcoholic Beverages (1.3%).

Meanwhile, the CPI for the second quarter of 2021 inclined 4.1 per cent to 123.1 as compared to 118.2 in the same quarter of the preceding year. On a quarterly basis, the CPI increased 0.5 per cent as compared to the first quarter of 2021. On a monthly basis, CPI increased by 0.1 per cent as compared to May 2021. The increase was attributed by Food & Non-Alcoholic Beverages (0.3%) and Miscellaneous Goods & Services (0.1%). This slow momentum was due to the implementation of Movement Control Order (MCO) 3.0 and operations closure for non-essential sectors throughout June 2021 has eased the inflation pressures.
