

## SERVICES PRODUCER PRICE INDEX MALAYSIA FIRST QUARTER OF 2018

Commencing First Quarter of 2018, the Producer Price Index (IHPPrP) uses an updated industry basket based on the Economic Census of 2016. There are four additional industries involved (48 industries in 2018 compared to 44 industries previously). The updating of the industrial basket will ensure that the products selected for SPPI compilation can measure the price changes imposed by an industry.

## **UPDATING BASKET**

The weights for updating SPPI (2010=100) is obtained from the Economic Census (BE) 2016.

The SPPI (2010=100) was prepared using the "Fixed Basket" method. The compilation of the indices uses the Chain Index method, which updates its basket without changing the base year.

Starting the first quarter 2018 (January - March, 2018), the index uses Laspeyres chain index method. The updating of SPPI basket (2010=100) used the findings of the Economics Cencus (BE) 2016.

Rebasing is different from the process of updating basket. It only changes its base period and it is purely a mechanical operation in forming a more convenient series for presentations and comparisons or estimates. Whereas, SPPI basket updates are using the old basket (2010=100) and updating products and its weight to become a new basket (2015=100).
